

THIS IS WHAT HAPPENS WHEN A FLY LANDS ON YOUR FOOD

- ❖ **Flies can't eat solid food, so to soften it up they vomit on it.**
- ❖ **Then they stamp the vomit in until it's a liquid, usually stamping in a few germs for good measure.**
- ❖ **Then when it's good and runny, they suck it all back again, probably dropping some excrement at the same time.**
- ❖ **And then when they've finished eating, it's your turn.**
